## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 19-22, 23-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Barak (US 5951510). Barak discloses a system for monitoring the delivery of clinical nutrition comprising a feeding tube, a device for monitoring the administration of enteral nutritional fluids 14 comprising a control circuit coupled to a metering device. The metering device comprises a pressure sensitive material such as a strain gauge. The device comprises a display, an input device, and an alarm (Col. 3, lines 17-30, 46-59).

### ***Claim Objections***

3. Claims 10-18, 32-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
